

LEARNING ZONE GUIDE

Content Guide		FRIDAY	SATURDAY
AN INTRODUCTION TO AI	<p>This course offers a clear introduction to Chat GPT, and how it generates it's responses i.e., learning language patterns through prediction rather than memorisation. . You'll then explore how safety guardrails help prevent harmful or biased outputs, and how user feedback improves the system.</p> <p>It goes on to explore the two different types - Discriminative and Generative AI and most importantly, explains how to use it effectively.</p>	9AM 1PM 6PM 11PM	1PM
AN INTRODUCTION TO MUSIC THEORY	<p>This course teaches the fundamentals of Music Theory using the piano to explain concepts like scales, intervals, chords, and the musical alphabet. Thus gaining an understanding of how notes combine to form melodies and harmonies. The course also covers music notation, time signatures, and common chord progressions found in popular songs. Designed for beginners, it builds confidence and creativity by helping learners recognise musical patterns.</p>	2PM	2PM
BRANDING DESIGN	<p>This creative course introduces learners to the process of logo and brand identity design. Focusing on combining theory with practical exercises in sketching, typography, and colour using only basic materials. Designed for independent in-cell study, the course develops transferable skills in marketing, communication, and design. Suitable for all levels, it provides a constructive and inspiring pathway into the creative industries</p>	3PM	3PM
